PROJECTS

Carecroft
Healthcare System

This application will provide treatment , nearby hospital , nearby laboratory, and booking appointment with doctors. we have provided map in hospital and laboratory feature which show list of hospital and laboratory in map. We have developed a Care chat which will help to book appointment with doctor and send mail to user when they book an appointment through Care chat.

Petluxa
Pet Related Services

Petluxa is a application where pet owners can give their pets to caretaker to take care of their pets for some particular period of time. If any pet owner wants to get any consultancy for their pets, then they get from the site by the specialized doctors. Also, there is an online store where you can refer the pet related goods sold by third party seller. The site allows third party sellers to add their products on the site. The site provides some additional features for adopting pet and frequently asked question module where any person asks questions regarding their pets and solve their doubts by experienced pet owners and doctors

Feedback System
Inhouse Project of Collage

In this system Student can give feedback to thier faculty and fauclty can see the feedback given by student in a graph format in thier portal but they cant see the name of that student. admin will manage the students and faculties.
